SUMMARY

Cloud and DevOps engineer with hands-on skills in AWS, Linux, Docker, and CI/CD, backed by a working Python and REST API development background. Four years in high-volume financial operations built a strong instinct for reliability, security, and process automation — the same instincts production DevOps work demands. Currently pursuing the AWS Certified Cloud Practitioner certification and seeking a junior Cloud/DevOps role.

CORE SKILLS

Cloud & Infrastructure: AWS (EC2, S3, IAM, VPC, Route 53, CloudWatch), Linux administration, Nginx, networking fundamentals, load balancers, security groups, SSH

DevOps & Automation: Docker, CI/CD pipelines, GitHub Actions, Bash / shell scripting, Infrastructure as Code, Git / GitHub, cloud monitoring

Programming & Development: Python, FastAPI, SQL, PostgreSQL, REST API development, Postman, Swagger / OpenAPI, JWT / OAuth2

Currently learning: Terraform, Kubernetes, serverless

PROJECTS

Link Saver — Python, FastAPI, PostgreSQL, SQLAlchemy, Alembic
github.com/kayefi737/Link-Saver

- Built a backend REST API to store and organize user links, with full CRUD endpoints (GET, POST, PUT, DELETE) over a PostgreSQL relational database.
- Implemented JWT and OAuth2 authentication for secure sessions and role-based access control.
- Designed the schema with SQLAlchemy ORM and version-controlled migrations with Alembic; validated request/response data with Pydantic and documented the API with Swagger / OpenAPI.

EXPERIENCE

Customer Service Officer — Access Bank Nigeria Plc, Lagos Nov 2022 – Dec 2025

- Held a 95% first-contact resolution rate across 80+ daily customer interactions under strict SLAs — a reliability and service-uptime mindset that carries directly into production support.
- Drove a 40% increase in digital-platform adoption by onboarding customers onto the bank's core banking system, supporting a wider digital transformation effort.
- Applied KYC / AML, customer due diligence, and sanctions-screening controls daily, building the security and access-control discipline relevant to IAM.
- Monitored transactions and escalated suspicious activity through defined protocols — analogous to incident detection and escalation workflows.

Administrative Assistant — Hybee Xchange, Lagos Nov 2020 – Aug 2021

- Maintained property and client databases in Excel at 100% data accuracy through structured validation protocols.
- Standardized listing workflows across multiple platforms, increasing property visibility by 35%.

Data Analyst Intern (NYSC) — Lagos State Internal Revenue Service Nov 2019 – Nov 2020

- Migrated and cleaned tax records from physical to digital formats, supporting the agency's ETL transition to its e-Tax platform.
- Entered and validated taxpayer data at 98% accuracy and built Excel summary reports and dashboards for audit readiness.

CERTIFICATIONS & TRAINING

- Cloud Computing Program — Techcrush, Cohort 6 (2026), Certificate of Completion.
- AWS Certified Cloud Practitioner — in progress.

EDUCATION

B.Sc, Business Administration — Ahmadu Bello University, Zaria	2023 – 2026
HND, Business Administration — Gateway Polytechnic, Saapade	2016 – 2018
ND, Business Administration — Gateway Polytechnic, Saapade	2013 – 2015
